

QWidget

FORM\_CLASS

DsgTools.CustomWidgets.Custom  
DbManagementWidgets.alterDefault  
Widget.AlterDefaultWidget

```
graph BT; A["DsgTools.CustomWidgets.CustomDbManagementWidgets.alterDefaultWidget.AlterDefaultWidget"] --> B[QWidget]; A --> C[FORM_CLASS];
```

The diagram illustrates a class hierarchy. At the bottom is a gray box containing the text 'DsgTools.CustomWidgets.CustomDbManagementWidgets.alterDefaultWidget.AlterDefaultWidget'. Two blue arrows originate from this box: one points to a white box labeled 'QWidget' on the left, and the other points to a white box labeled 'FORM\_CLASS' on the right. This indicates that the class in the gray box inherits from both QWidget and FORM\_CLASS.
