

DsgTools.CustomWidgets.custom
TableSelector.CustomTableSelector.filterTree

```
graph LR; A[DsgTools.CustomWidgets.customTableSelector.on_filterLineEdit_textChanged] --> B[DsgTools.CustomWidgets.customTableSelector.filterTree];
```

The diagram illustrates a signal connection in a Qt-based application. It consists of two rectangular boxes. The box on the left is shaded gray and contains the text 'DsgTools.CustomWidgets.customTableSelector.filterTree'. The box on the right is white with a black border and contains the text 'DsgTools.CustomWidgets.customTableSelector.on_filterLineEdit_textChanged'. A blue arrow points from the right box to the left box, indicating that the signal emitted by the widget in the right box is connected to the filterTree property of the custom table selector in the left box.
